SUMMARY

Software Engineer specializing in .NET, distributed systems, financial integrations and AI-assisted software engineering. Experienced building scalable enterprise applications on Azure and AWS, leveraging AI to accelerate architecture, implementation, testing and code reviews while delivering reliable, high-performance systems.

SKILLS

C#, .NET, ASP.NET Core, SQL Server, AI-assisted Software Engineering, MongoDB, Redis, Azure (Service Bus, Devops, Pipelines), AWS (Lambda, S3, SQS), Terraform, Docker, RabbitMQ, GRPC, Clean Architecture, DDD, CQRS, RESTful API's, CI/CD, xUnit, Moq, Vue3, React, Git, GitHub Actions

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Framework Digital, São Paulo, BR – Remote 07/2024 to Present
Core Responsibilities:

- Developed a large-scale Debt Recovery platform using a .NET microservices architecture integrated with multiple systems to optimize contract and claims management, recovering over $22M+ in unpaid installments, improving collection efficiency and reducing operational overhead
- Built reusable infrastructure automation using Terraform and integrated CI/CD pipelines via Azure DevOps, reducing environment setup time from hours to minutes.
- Developed and maintained a distributed microservices platform supporting returns, refunds and branch management, integrating more than 15 payment acquirers, banks and financial providers.
- Leveraged AI-assisted software engineering throughout the development lifecycle to accelerate architecture design, implementation, automated testing and code reviews while maintaining production-quality standards.

Key Technologies and Tools: .NET 10, SQL Server, Azure Service Bus, RabbitMQ, Terraform, Redis, DDD

Software Engineer
Polícia Militar do Estado de São Paulo, São Paulo, BR – On-site 11/2023 to 07/2024
Core Responsibilities:

- Implemented a distributed case creation and dispatch system to coordinate patrol units, improving communication flow and reducing response times by 62% for urgent incidents.
- Led the backend development for a time management system for COPOM, designing complex business logic. Automated the process of registering employee timesheets, eliminating the need for manual data entry. The automation cut the processing time in half, reducing errors and saving approximately 100 hours of manual work each month.
- Refactored internal processes to handle high-volume traffic, optimizing thread and queue configurations to prevent resource starvation under load.

Key Technologies and Tools: .NET 8, SQL Server, Azure Service Bus, Terraform, Redis, DDD, gRPC
Software Engineer

Vale, São Paulo, BR – Remote 02/2023 to 10/2023

Core Responsibilities:

- Developed a scalable internship management and testing platform for Vale, supporting tens of thousands of students with 99.9% uptime and increasing participation by 30%.
- Designed and implemented responsive user interfaces using Vue 3 and Bootstrap 5, improving usability and delivering a consistent experience across desktop and mobile devices.
- Ensured environment consistency and scalability by implementing Dockerized builds and Github Actions pipelines, automating testing and deployment processes.
- Supported IaC adoption by contributing Terraform templates for provisioning API resources and testing infrastructure.

Key Technologies and Tools: .NET 6, PostgreSQL, Vue3, Bootstrap 5, Docker, Terraform, GitHub Actions

Software Engineer

NFE.io, São Paulo, BR – Remote 08/2020 to 01/2023

Core Responsibilities:

- Developed serverless solutions for processing electronic invoices using AWS Lambda, storing generated PDFs in S3, and decoupling workflows via SQS, cutting idle Lambda time and execution costs by 30%.
- Automated backend provisioning and deployment with Terraform and Docker, ensuring environment parity and faster rollouts.
- Built scalable APIs in .NET Core + MongoDB, reducing data processing latency by 5 seconds per transaction and maintaining stable performance at 10 000+ requests per day.
- Mentored 200+ aspiring developers, achieving a 90% satisfaction rate, and promoting diversity in tech.

Key Technologies and Tools: AWS Lambda, S3, SQS, Docker, Terraform, C#, .NET Core, MongoDB

EDUCATION

Technologist of System Analysis and Development

Universidade São Judas Tadeu, São Paulo, Brazil 02/2022 to 12/2024

CERTIFICATES

Microsoft Certified: Azure Fundamentals, Microsoft, USA July/2021

LANGUAGES

Portuguese: Native

English: C1
